TRANSACTIONS OF AMERICAN SOCIETY FOR STEEL TREATING

July, 1929—December, 1929

A

Anderson, E. A. 808, 811
Archer, R. S. 551

B

Boston, O. W. 659

C

Carlin, J. E. 293
Comstock, G. F. 809
Crook, Welton J. 415

E

Eaton, G. M. 819
Egan, J. J. *175
Epstein, Samuel *19

F

Fink, W. L. 551
French, H. J. 711
Fry, Adolph *111

G

Goss, N. P. 405
Gow, J. T. *119
Greene, O. V. 57
Griffiths, W. E. 257
Grossmann, Marcus A. 1, 165

H

Hall, John Howe 458
Hall, Wesley B. 399
Hamill, T. E. 711
Harder, O. E. *119
Hatfield, W. H. 121, 278
Herbert, Edward G. 77
Holder, G. C. 815
Homerberg, V. O. *67
Honda, Kotaro 97, 183
Hultgren, Axel 227

J

Jameson, A. S. 937
Jominy, W. E. 298, 372, 893

K

Ketcham, W. J. *183
Kihlgren, T. E. 171, 326
Kinzel, A. B. *175
Kjerrman, Bengt 393
Knowlton, H. B. 607

L

Lester, H. H. *1, 743

M

Malcolm, V. T. *205
McKeehan, L. W. 461
McMullan, O. W. 860
McQuaid, H. W. *183, 860
Meissner, C. E. 257
Merica, Paul D. 314, 452
Merten, William J. 600
Murakami, Takejiro 339

N

Nealey, J. B. 429

P

Pilling, N. B. 171, 326

R

Roath, E. W. 963

S

Sergeson, Robert *145
Sisco, F. T. 155, 435, 626, 950
Sperry, Elmer A. 771
Strauss, Jerome 191

T

Takei, Takeshi 339

W

Walsted, J. P. *67
Willey, L. A. *119

INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME XVI

TRANSACTIONS OF AMERICAN SOCIETY FOR STEEL TREATING

JULY, 1929—DECEMBER, 1929

A

Ac_1 Range of Carbon Steel and Related Phenomena—*Axel Hultgren* 227
Acid Open-Hearth Heats; Melting Record of Three—
W. E. Griffiths and C. E. Meissner 257
Address; President's Annual 529
Alloying Element in Steel; Chromium as an—*Marcus A. Grossmann* 165
Alloys; Constitution of Copper-Lead—*G. C. Holder* 815
Alloys; Constitution of Copper-Phosphorus—*E. W. Roath* 963
Alloys; Constitution of Iron-Sulphur—*G. F. Comstock* 809
Alloys; Constitution of Nickel-Carbon—*N. B. Pilling and T. E. Kihlgren* 171
Alloys; Constitution of Nickel-Manganese
N. B. Pilling and T. E. Kihlgren 326
Alloys; Constitution of Zinc-Aluminum—*E. A. Anderson* 808
Alloys for Industrial Applications Requiring Extreme Stability; Metals and—*Jerome Strauss* 191
Aluminum Alloys; Constitution of Zinc—*E. A. Anderson*..... 808
Aluminum Steel; White Layer in Gun Tubes and its Relation to the Case of Nitrided Chromium—*H. H. Lester* *1
Annual Address; President's 529
Annual Banquet 535
Annual Convention and Exposition 513
Annual Report; Secretary's 520
Annual Report; Treasurer's 526
Annealing on the Grain Structure of Extremely Hard-Rolled Steel Ribbon; Effect of—*N. P. Goss* 405
Annealing of Steel Castings; Improving of Refractory Lining of Heat Treating Furnaces for High Temperature—*William J. Merten* 600
Annealing Steel Sheets in Continuous Gas-Fired Kilns—*J. B. Nealey* 429
Application of Science to the Steel Industry—*W. H. Hatfield* 121, 278
Aqueous Solutions for the Quenching of Steels; Hot—
H. J. French and T. E. Hamill 711
Austenitic Manganese Steels—*John Howe Hall* 458

B

Banquet; Annual 535
Baths for the Hardening of High Speed Steel; Salt—*Bengt Kjerrman* ... 393
Bearings; Steel Inspection Standards for Roller—*A. S. Jameson* 937
Brittle Range in 18 and 8 Chromium-Nickel Iron—*H. H. Lester* 743
Burning and Overheating of Steel; Study of the—Parts I, II and III—
W. E. Jominy 298, 372, 893

C

Carbon Alloys; Constitution of Nickel—*N. B. Pilling and T. E. Kihlgren* 171
Carbon Steel and Related Phenomena; Ac_1 Range of—*Axel Hultgren* 227

*Numbers preceded by an asterisk refer to page numbers of the Special Nitriding Symposium edition of Transactions appended to this volume.

Carbon System; On the Double Diagram of the Iron—*Kotaro Honda*... 183
Carburizing Materials; Economical Re-Use of—*H. B. Knowlton* 607
Case Hardening Steels for Highly Stressed Gears; Selection of—*H. W. McQuaid and O. W. McMullan* 860
Case of Nitrided Chromium-Aluminum Steel; White Layer in Gun Tubes and its Relation to the—*H. H. Lester* *1
Cast Iron; Constitution of Steel and—*F. T. Sisco* 155, 435, 626, 950
Cast Iron; Nickel—*Paul D. Merica* 314
Cast Iron; Nickel-Chromium—*Paul D. Merica* 452
Castings; Improving of Refractory Lining of Heat Treating Furnaces for High Temperature Annealing of Steel—*William J. Merten* 600
Characteristics of Pearlite in Eutectoid Rail Steels—*O. V. Greene* 57
Chemistry of Rimmed Steel; Physical—*J. E. Carlin* 293
Chisels; Tentative Recommended Practice for Heat Treatment of 325
Chromium-Aluminum Steel; White Layer in Gun Tubes and its Relation to the Case of Nitrided—*H. H. Lester* *1
Chromium as an Alloying Element in Steel—*Marcus A. Grossmann* 165
Chromium Cast Iron; Nickel—*Paul D. Merica* 452
Chromium-Nickel Iron; Brittle Range in 18 and 8—*H. H. Lester* 743
Cloudburst Process for Hardness Testing and Hardening—*Edward G. Herbert* 77
Comment and Discussion 965
Comments on the Convention; Press 508
Committee Releases; Recommended Practice.....165, 314, 452, 808, 960
Constants of Zinc; Physical—*E. A. Anderson* 811
Constitution of Copper-Lead Alloys—*G. C. Holder* 815
Constitution of Copper-Phosphorus Alloys—*E. W. Roath* 963
Constitution of Iron-Sulphur Alloys—*G. F. Comstock* 809
Constitution of Nickel-Carbon Alloys—*N. B. Pilling and T. E. Kihlgren* 171
Constitution of Nickel-Manganese Alloys—*N. B. Pilling and T. E. Kihlgren* 326
Constitution of Steel and Cast Iron—*F. T. Sisco*.....155, 435, 626, 950
Constitution of Zinc-Aluminum Alloys—*E. A. Anderson*..... 808
Continuous Gas-Fired Kilns; Annealing Steel Sheets in—*J. B. Nealey*... 429
Control Methods for Small Heat Treatment Plants; Proposed—*Welton J. Crook* 415
Convention and Exposition; Annual 513
Convention; Press Comments on the 508
Copper-Lead Alloys; Constitution of—*G. C. Holder* 815
Copper-Phosphorus Alloys; Constitution of—*E. W. Roath* 963
Crystals; On the Nature of Martensite—*Kotaro Honda* 97
Cyanides; Short-Time Nitriding of Steel in Molten—*A. B. Kinzel and J. J. Egan* *175

D

Determining the Machinability of Metals in General, with Results; Methods of Tests for—*O. W. Boston* 659
Diagram of the Iron-Molybdenum System; Equilibrium—*Takeshi Takei and Takejiro Murakami* 339
Dilatation of Steel During Quenching—*G. M. Eaton* 819
Discussion; Nitriding General *217
Discussion and Comment 965
Double Diagram of the Iron-Carbon System—*Kotaro Honda* 183

E

Economical Re-Use of Carburizing Materials—*H. B. Knowlton* 607
Effect of Annealing on the Grain Structure of Extremely Hard-Rolled Steel Ribbon—*N. P. Goss* 405
Engineering Index 173, 331, 476, 643, 799, 969

*Numbers preceded by an asterisk refer to page numbers of the Special Nitriding Symposium edition of Transactions appended to this volume.

Equilibrium Diagram of the Iron-Molybdenum System—
Takeshi Takei and Takejiro Murakami 339
Etch Test for Iron and Steel; Tentative Recommended Practice for a Standard Macro 960
Eutectoid Rail Steels; Some Characteristics of Pearlite in—*O. V. Greene* 57
Exposition; Annual Convention and 513
Extremely Hard-Rolled Steel Ribbon; Effect of Annealing on the Grain Structure of—*N. P. Goss* 405

F

Few Practical Fundamentals of the Nitriding Process—
H. W. McQuaid and W. J. Ketcham *183
Fractured Surfaces; Preservation of 965
Fundamentals of the Nitriding Process; Few Practical—
H. W. McQuaid and W. J. Ketcham *183
Furnace for Heat Treating High Speed Steel; New—*Wesley B. Hall* 399
Furnaces for High Temperature Annealing of Steel Castings; Improving of Refractory Lining of Heat Treating—*William J. Merten* 600

G

Gas-Fired Kilns; Annealing Steel Sheets in Continuous—*J. B. Nealey* ... 429
Gears; Selection of Case Hardening Steels for Highly Stressed—
H. W. McQuaid and O. W. McMullan 860
General Discussion; Nitriding *217
General Results; Methods of Tests for Determining the Machinability of Metals—*O. W. Boston* 659
Glossary of Terms Used in X-ray Metallography—*L. W. McKeehan* 461
Grain Structure of Extremely Hard-Rolled Steel Ribbon; Effect of Annealing on the—*N. P. Goss* 405
Gun Tubes and Its Relation to the Case of Nitrided Chromium-Aluminum Steel; White Layer in—*H. H. Lester* *1

H

Hard-Rolled Steel Ribbon; Effect of Annealing on the Grain Structure of Extremely—*N. P. Goss* 405
Hardening; Cloudburst Process for Hardness Testing and—
Edward G. Herbert 77
Hardening of High Speed Steel; Salt Baths for the—*Bengt Kjerrman* ... 393
Hardening Steels for Highly Stressed Gears; Selection of Case—
H. W. McQuaid and O. W. McMullan 860
Hardness Testing and Hardening; Cloudburst Process for—
Edward G. Herbert 77
Heat Treating High Speed Steel; New Furnace for—*Wesley B. Hall* 399
Heat Treating Furnaces for High Temperature Annealing of Steel Castings; Improving of Refractory Lining of—*William J. Merten* 600
Heat Treatment of Chisels; Tentative Recommended Practice for 325
Heat Treatment Plants; Proposed Control Methods for Small—
Welton J. Cook 415
Heats; Melting Record of Three Acid Open-Hearth—
W. E. Griffiths and C. E. Meissner 257
High Speed Steel; New Furnace for Heat Treating—*Wesley B. Hall* ... 399
High Speed Steel; Salt Baths for the Hardening of—*Bengt Kjerrman* ... 393
High Temperature Annealing of Steel Castings; Improving of Refractory Lining of Heat Treating Furnaces for—*William J. Merten* 600
High Temperature High Pressure Steam Service; Use of Nitrided Steel in—*Vincent T. Malcolm* *205
Highly Stressed Gears; Selection of Case Hardening Steels for—
H. W. McQuaid and O. W. McMullan 860

*Numbers preceded by an asterisk refer to page numbers of the Special Nitriding Symposium edition of Transactions appended to this volume.

Hot Aqueous Solutions for the Quenching of Steels—*H. J. French and T. E. Hamill* 711

I

Improving of Refractory Lining of Heat Treating Furnaces for High Temperature Annealing of Steel Castings—*William J. Merten* 600
Index, Engineering 173, 331, 476, 643, 799, 969
Industry; Application of Science to the Steel—*W. H. Hatfield* 121, 278
Industry; Radiography as a Tool in the Metal—*W. L. Fink and R. S. Archer* 551
Industrial Applications of Metals and Alloys Requiring Extreme Stability—*Jerome Strauss* 191
Influence on the Structure of Steel; Oxygen Dissolved in—*Marcus A. Grossmann* 1
Inspection Standards for Roller Bearings; Steel—*A. S. Jameson* 937
Investigations in Nitriding—*Robert Sergeson* *145
Iron; Brittle Range in 18 and 8 Chromium-Nickel—*H. H. Lester* 743
Iron; Constitution of Steel and Cast—*F. T. Sisco* 155, 435, 626, 950
Iron; Nickel Cast—*Paul D. Merica* 314
Iron; Nickel-Chromium Cast—*Paul D. Merica* 452
Iron and Steel; Tentative Recommended Practice for a Standard Macro Etch Test for 960
Iron-Carbon System; On the Double Diagram of the—*Kotaro Honda* ... 183
Iron-Nitrogen System; Observations on the—*Samuel Epstein* *19
Iron-Molybdenum System; Equilibrium Diagram of the—*Takeshi Takei and Takejiro Murakami* 339
Iron-Sulphur Alloys; Constitution of—*G. F. Comstock* 809

K

Kilns; Annealing Steel Sheets in Continuous Gas-Fired—*J. B. Nealey* ... 429

L

Lead Alloys; Constitution of Copper—*G. C. Holder* 815
Lining of Heat Treating Furnaces for High Temperature Annealing of Steel Castings; Improving of Refractory—*William J. Merten* 600

M

Machinability of Metals in General, with Results; Methods of Tests for Determining the—*O. W. Boston* 659
Macro Etch Test for Iron and Steel; Tentative Recommended Practice for a Standard 960
Manganese Alloys; Constitution of Nickel—*N. B. Pilling and T. E. Kihlgren* 326
Manganese Steels; Austenitic—*John Howe Hall* 458
Martensite Crystals; On the Nature of—*Kotaro Honda* 97
Materials; Economical Re-Use of Carburizing—*H. B. Knowlton* 607
Measuring Molten Metal Temperatures 965
Melting Record of Three Acid Open-Hearth Heats—*W. E. Griffiths and C. E. Meissner* 257
Metal Industry; Radiography as a Tool in the—*W. L. Fink and R. S. Archer* 551
Metal Temperatures; Measuring Molten 965
Metallography; Glossary of Terms Used in X-ray—*L. W. McKeehan* 461
Metals and Alloys for Industrial Applications Requiring Extreme Stability—*Jerome Strauss* 191
Metals in General, with Results; Methods of Tests for Determining the Machinability of—*O. W. Boston* 659

*Numbers preceded by an asterisk refer to page numbers of the Special Nitriding Symposium edition of Transactions appended to this volume.

Methods for Small Heat Treatment Plants; Proposed Control—
Welton J. Crook 415
Methods of Tests for Determining the Machinability of Metals in General, with Results—*O. W. Boston* 659
Molten Cyanides; Short-Time Nitriding of Steel in—
A. B. Kinzel and J. J. Egan *175
Molten Metal Temperatures; Measuring 965
Molybdenum System; Equilibrium Diagram of the Iron—
Takeshi Takei and Takejiro Murakami 339

N

Nature of Martensite Crystals—*Kotaro Honda* 97
New Furnace for Heat Treating High Speed Steel—*Wesley B. Hall* 399
New Officers Nominated 503
News of the Society 491, 816
Nickel-Carbon Alloys; Constitution of—*N. B. Pilling and T. E. Kihlgren* 171
Nickel Cast Iron—*Paul D. Merica* 314
Nickel-Chromium Cast Iron—*Paul D. Merica* 452
Nickel-Manganese Alloys; Constitution of—
N. B. Pilling and T. E. Kihlgren 326
Nickel Iron; Brittle Range in 18 and 8 Chromium—*H. H. Lester* 743
Nitrided Chromium-Aluminum Steel; White Layer in Gun Tubes and Its Relation to the Case of—*H. H. Lester* *1
Nitrided Steel in High Temperature High Pressure Steam Service; Use of—*Vincent T. Malcolm* *205
Nitriding; General Discussion *217
Nitriding; Investigations in—*Robert Sergeson* *145
Nitriding of Steel in Molten Cyanides; Short-Time—
A. B. Kinzel and J. J. Egan *175
Nitriding Process—*Adolph Fry* *111
Nitriding Process; Few Practical Fundamentals of the—
H. W. McQuaid and W. J. Ketcham *183
Nitriding Process; Study of the, Part I—
V. O. Homerberg and J. P. Walsted *67
Nitriding Steels; Researches on—
O. E. Harder, J. T. Gow and L. A. Willey *119
Nitrogen System; Observations on the Iron—*Samuel Epstein* *19
Nominated; New Officers 503
Nondestructive Testing—*Elmer A. Sperry* 771

O

Observations on the Iron-Nitrogen System—*Samuel Epstein* *19
Officers Nominated; New 503
Open-Hearth Heats; Melting Record of Three Acid—
W. E. Griffiths and C. E. Meissner 257
Overheating of Steel; Study of the Burning and, Parts I, II and III—
W. E. Jominy 298, 372, 893
Oxygen Dissolved in Steel, and Its Influence on the Structure—
Marcus A. Grossmann 1

P

Patents; Reviews of Recent 328, 474, 640, 966
Pearlite in Eutectoid Rail Steels; Some Characteristics of—*O. V. Greene* 57
Phosphorus Alloys; Constitution of Copper—*E. W. Roath* 963
Physical Chemistry of Rimmed Steel—*J. E. Carlin* 293
Physical Constants of Zinc—*E. A. Anderson* 811

*Numbers preceded by an asterisk refer to page numbers of the Special Nitriding Symposium edition of Transactions appended to this volume.

Plants; Proposed Control Methods for Small Heat Treatment—
Welton J. Crook 415
Practical Fundamentals of the Nitriding Process; Few—
H. W. McQuaid and W. J. Ketcham *183
Practice for Heat Treatment of Chisels; Tentative Recommended 325
Preservation of Fractured Surfaces 965
President's Annual Address 529
Press Comments on the Convention 508
Pressure Steam Service; Use of Nitrided Steel in High Temperature
High—*Vincent T. Malcolm* *205
Process; Few Practical Fundamentals of the Nitriding—
H. W. McQuaid and W. J. Ketcham *183
Process; Nitriding—*Adolph Fry* *111
Process; Study of the Nitriding, Part I—
V. O. Homerberg and J. P. Walsted *67
Process for Hardness Testing and Hardening; Cloudburst—
Edward G. Herbert 77
Proposed Control Methods for Small Heat Treatment Plants—
Welton J. Crook 415

Q

Quenching; Dilatation of Steel During—*G. M. Eaton* 819
Quenching of Steels; Hot Aqueous Solutions for the—
H. J. French and T. E. Hamill 711

R

Radiography as a Tool in the Metal Industry—
W. L. Fink and R. S. Archer 551
Rail Steels; Some Characteristics of Pearlite in Eutectoid—*O. V. Greene* 57
Range of Carbon Steel and Related Phenomena; Ac_1—*Axel Hultgren* ... 227
Recent Patents; Reviews of 328, 474, 640, 966
Record of Three Acid Open-Hearth Heats; Melting—
W. E. Griffiths and C. E. Meissner 257
Related Phenomena; Ac_1 Range of Carbon Steel and—*Axel Hultgren* 227
Recommended Practice Committee Releases 165, 314, 452, 808, 960
Recommended Practice for Heat Treatment of Chisels; Tentative 325
Recommended Practice for a Standard Macro Etch Test for Iron and
Steel; Tentative 960
Refractory Lining of Heat Treating Furnaces for High Temperature An-
nealing of Steel Castings; Improving of—*William J. Merten* 600
Relation to the Case of Nitrided Chromium-Aluminum Steel; White Layer
in Gun Tubes and Its—*H. H. Lester* *1
Releases; Recommended Practice Committee 165, 314, 452, 808, 960
Report; Secretary's Annual 520
Report; Treasurer's Annual 526
Researches on Nitriding Steels—
O. E. Harder, J. T. Gow and L. A. Willey *119
Reviews of Recent Patents 328, 474, 640, 966
Re-Use of Carburizing Materials; Economical—*H. B. Knowlton* 607
Ribbon; Effect of Annealing on the Grain Structure of Extremely Hard-
Rolled Steel—*N. P. Goss* 405
Rimmed Steel; Physical Chemistry of—*J. E. Carlin* 293
Rolled Steel Ribbon; Effect of Annealing on the Grain Structure of Ex-
tremely Hard—*N. P. Goss* 405
Roller Bearings; Steel Inspection Standards for—*A. S. Jameson* 937

S

Salt Baths for the Hardening of High Speed Steel—*Bengt Kjerrman* 393

*Numbers preceded by an asterisk refer to page numbers of the Special Nitriding Symposium edition of Transactions appended to this volume.

Science to the Steel Industry; Application of—*W. H. Hatfield* 121, 278
Secretary's Annual Report 520
Selection of Case Hardening Steels for Highly Stressed Gears—
H. W. McQuaid and O. W. McMullan 860
Service; Use of Nitrided Steel in High Temperature High Pressure Steam—*Vincent T. Malcolm* *205
Sheets in Continuous Gas-Fired Kilns; Annealing Steel—*J. B. Nealey*... 429
Short-Time Nitriding of Steel in Molten Cyanides—
A. B. Kinzel and J. J. Egan *175
Small Heat Treatment Plants; Proposed Control Methods for—
Welton J. Crook 415
Society; News of the 491, 816
Solutions for the Quenching of Steels; Hot Aqueous—
H. J. French and T. E. Hamill 711
Some Characteristics of Pearlite in Eutectoid Rail Steels—*O. V. Greene* 57
Stability; Metals and Alloys for Industrial Applications Requiring Extreme—*Jerome Strauss* 191
Standard Macro Etch Test for Iron and Steel; Tentative Recommended Practice for a 960
Standards for Roller Bearings; Steel Inspection—*A. S. Jameson* 937
Steam Service; Use of Nitrided Steel in High Temperature High Pressure—*Vincent T. Malcolm* *205
Steel; Chromium as an Alloying Element in—*Marcus A. Grossmann* 165
Steel; New Furnace for Heat Treating High Speed—*Wesley B. Hall* ... 399
Steel; Physical Chemistry of Rimmed—*J. E. Carlin* 293
Steel; Salt Baths for the Hardening of High Speed—*Bengt Kjerrman* ... 393
Steel; Study of the Burning and Overheating of, Parts I, II and III—
W. E. Jominy 298, 372, 893
Steel; White Layer in Gun Tubes and Its Relation to the Case of Nitrided Chromium-Aluminum—*H. H. Lester* *1
Steel; Tentative Recommended Practice for a Standard Macro Etch Test for Iron and 960
Steel and Cast Iron; Constitution of—*F. T. Sisco* 155, 435, 626, 950
Steel and Related Phenomena; Ac_1 Range of Carbon—*Axel Hultgren* ... 227
Steel; Oxygen Dissolved in and Its Influence on the Structure—
Marcus A. Grossmann 1
Steel Castings; Improving of Refractory Lining of Heat Treating Furnaces for High Temperature Annealing of—*William J. Merten* 600
Steel During Quenching; Dilatation of—*G. M. Eaton* 819
Steel in High Temperature High Pressure Steam Service; Use of Nitrided—*Vincent T. Malcolm* *205
Steel in Molten Cyanides; Short-Time Nitriding of—
A. B. Kinzel and J. J. Egan *175
Steel Industry; Application of Science to the—*W. H. Hatfield* 121, 278
Steel Inspection Standards for Roller Bearings—*A. S. Jameson* 937
Steel Ribbon; Effect of Annealing on the Grain Structure of Extremely Hard-Rolled—*N. P. Goss* 405
Steel Sheets in Continuous Gas-Fired Kilns; Annealing—*J. B. Nealey* ... 429
Steels; Austenitic Manganese—*John Howe Hall* 458
Steels; Hot Aqueous Solutions for the Quenching of—
H. J. French and T. E. Hamill 711
Steels; Researches on Nitriding—
O. E. Harder, J. T. Gow and L. A. Willey *119
Steels; Some Characteristics of Pearlite in Eutectoid Rail—*O. V. Greene* 57
Steels for Highly Stressed Gears; Selection of Case Hardening—
H. W. McQuaid and O. W. McMullan 860
Stressed Gears; Selection of Case Hardening Steels for Highly—
H. W. McQuaid and O. W. McMullan 860
Structure; On Oxygen Dissolved in Steel and Its Influence on the—
Marcus A. Grossmann 1
Structure of Extremely Hard-Rolled Steel Ribbon; Effect of Annealing on the Grain—*N. P. Goss* 405

*Numbers preceded by an asterisk refer to page numbers of the Special Nitriding Symposium edition of Transactions appended to this volume.

Study of the Burning and Overheating of Steel, Parts I, II and III—
W. E. Jominy 298, 372, 893
Study of the Nitriding Process, Part I—
V. O. Homerberg and J. P. Walsted *67
Surfaces; Preservation of Fractured 965
Sulphur Alloys; Constitution of Iron—*G. F. Comstock* 809
System; Observations on the Iron-Nitrogen—*Samuel Epstein* *19

T

Temperature High Pressure Steam Service; Use of Nitrided Steel in High—*Vincent T. Malcolm* *205
Temperatures; Measuring Molten Metal 965
Tentative Recommended Practice for Heat Treatment of Chisels 325
Tentative Recommended Practice for a Standard Macro Etch Test for Iron and Steel 960
Terms Used in X-ray Metallography; Glossary of—*L. W. McKeehan* ... 461
Testing; Nondestructive—*Elmer A. Sperry* 771
Test for Iron and Steel; Tentative Recommended Practice for a Standard Macro Etch 960
Testing and Hardening; Cloudburst Process for Hardness—
Edward G. Herbert 77
Tests for Determining the Machinability of Metals in General, with Results; Methods of—*O. W. Boston* 659
Three Acid Open-Hearth Heats; Melting Record of—
W. E. Griffiths and C. E. Meissner 257
Time Nitriding of Steel in Molten Cyanides; Short—
A. B. Kinzel and J. J. Egan *175
Tool in the Metal Industry; Radiography as a—
W. L. Fink and R. S. Archer 551
Treasurer's Annual Report 526
Treating Furnaces for High Temperature Annealing of Steel Castings; Improving of Refactory Lining of Heat—*William J. Merten* 600
Treating High Speed Steel; New Furnace for Heat—*Wesley B. Hall* 399
Treatment of Chisels; Tentative Recommended Practice for 325
Treatment Plants; Proposed Control Methods for Small Heat—
Welton J. Crook 415
Tubes and Its Relation to the Case of Nitrided Chromium-Aluminum Steel; White Layer in Gun—*H. H. Lester* *1

U

Use of Nitrided Steel in High Temperature High Pressure Steam Service—*Vincent T. Malcolm* *205

W

White Layer in Gun Tubes and Its Relation to the Case of Nitrided Chromium-Aluminum Steel—*H. H. Lester* *1

X

X-ray Metallography; Glossary of Terms Used in—*L. W. McKeehan* .. 461
X-rays as a Tool in the Metal Industry—*W. L. Fink and R. S. Archer*... 551

Z

Zinc; Physical Constants of—*E. A. Anderson* 811
Zinc-Aluminum Alloys; Constitution of—*E. A. Anderson* 808
